

Pediatric Health Options for Children of Low to Moderate Income Families

Child Health & Disability Prevention Program (CHDP): The CHDP program provides physical exams for babies, children, teens and young adults. CHDP approved provider sites offer health assessments to identify problems early, begin needed treatment and prevent disease and disabilities. Individuals from birth to 21 years who have full-coverage Medi-Cal are eligible, as are those up to 19 years from low- or moderate-income families. The CHDP health assessments are FREE and include the following services:

- Health and developmental history
- Physical examination
- Nutritional assessment
- Immunizations
- Vision testing
- Tuberculin Skin Testing
- Hearing testing
- Laboratory tests (e.g., sickle cell, blood lead screening, urinalysis, hemoglobin/hematocrit, Pap smears, ova/parasites, sexually transmitted diseases)
- Health education and anticipatory guidance

CHDP exams are also available for entry to school, sports, camp, Head Start, state preschool and foster care. In addition to health assessment services, CHDP provides coordination to assist families with medical appointment scheduling, information about transportation and access to diagnostic and treatment services.

For more information about CHDP, please call 538-6222.

Dental care is provided to people with Medi-Cal under a program called Denti-Cal. To find a participating dentist, call Denti-Cal at 1-800-322-6384 or call a dentist and ask if they take Medi-Cal.

In Butte County, the following providers will usually accept Medi-Cal. However, it is the patient's responsibility to verify acceptance before seeking service:
